## How do you benefit from Anderson courses?

### Time (lots of it)

You have *five* years from the copyright date of the book to complete your course.

### In a hurry?

If you already have the book, we can e-mail any quiz if you order by phone.

We also have a growing list of online quizzes available at [andersonCE.com](http://andersonCE.com).

### Need your certificate *fast*?

**Fax your answer sheet to 1 (916) 856-5066 or 856-5067 or e-mail it to [hello@andersonCE.com](mailto:hello@andersonCE.com).**

Your certificate will be in the mail the next working day.

Also, *if you request it*, we'll fax (or e-mail) your certificate back to you the following day — *There is no charge for this service!*

### Free-for-the-asking two contact hours

with your order of at least 24 contact hours

*(You must request them — see page 7.)*

### Course up-to-date?

You'll know, because we provide you with the publication date of every title, allowing you to make the decision as to whether it's timely.

### Multiple-choice test

Each test written for the text by a Master's-trained registered nurse.

### Full refund

You get **all** your money back — including regular shipping — **for up to SIXTY days.**

### Exchange

your unused course for a new one (with no extra charges added) **for up to one year.**

## Medical-Surgical Nursing

**NEW**

*Clinical Companion to Medical-Surgical Nursing: Patient-Centered Collaborative Care* is a portable guide to 250 common medical-surgical conditions and their management.

### Features:

**CCM**

- Convenient A-Z organization makes key information easy to find.
- *Critical Rescue* and *Clinical Landmine* highlights help you to identify critical changes in patient status and to avoid common pitfalls in nursing care.
- Information is provided on emerging disorders such as avian influenza and MRSA.

When asked about the book, Pilot Study nurses responded: "Loved it." "This is an excellent reference book that I can put to use in my work. It is the kind of reference I have wanted for years because it is disease-specific." "It is well organized. I can see it being in the reference area of many hospital floors. I learned a lot!" "Really appreciate the format—ease of locating information about topics—this one I'll keep with me in my office for quick reference."

By Winkelman, RN, PhD, CCRN, ACNP, et al / 6th edition  
Published by Saunders Elsevier in 2010 / Course valid thru 12/31/15 / Soft cover / 679 pages plus 11 appendices and an index / 3 lb

**34 contact hours** (book and quiz) \$65

Order code: MEDSURG1034

Quiz-only packet: \$29

**17/17 contact hours** (book and 2 quizzes, each worth 17 contact hours) \$65

Order code: MEDSURG1017AB

Both quiz-only packets: \$31 (\$21 + \$10)

**Book only (publisher's price) \$42**

### Benefit

**1**

#### *Fax or e-mail your answer sheet ...*

... seven days a week, 24 hours a day. The date you fax is the date that goes on your certificate. If you'd like to check on your fax, please call the following morning. The certificate is mailed that next day.

If you'd like your certificate faxed to you the next work day, write "please fax back" and your fax number on your answer sheet. This service is free!

**Our fax numbers are: 1 (916) 856-5066 or 856-5067.**

Or you can e-mail your answer sheet to [hello@andersonCE.com](mailto:hello@andersonCE.com) and request that we e-mail your certificate back to you. You'll receive your certificate the next work day.

## End of Life

In *End of Life: A Nurse's Guide to Compassionate Care*, you'll find insights on communication, legal and ethical issues, cultural and spiritual considerations, and nursing care for the patient, family, and staff. Also includes *Expert Insights*: answers to nurses' questions by a nurse expert.

### Inside you'll find:

Essential communication skills;  
Ethical and legal considerations;  
Evidence-based care; Palliative drug therapy; Psychosocial, spiritual, and cultural care; Patients with cancer; Patients with heart failure; Patients with neurologic disease; Patients with pulmonary disease; Patients with renal disease; Care of a dying child; Family and caregiver care; Support systems; When death nears; Bereavement care; Issues in acute care setting; and Documenting care.

## Leadership

For those interested in the topic of leadership, *The New Leadership Challenge: Creating the Future of Nursing* may have something to offer. Pilot nurses wrote: "loved it, timely, relevant, provocative;" "excellent, valuable tool;" "wish I had this type of course in nursing school;" "really enjoyed the leadership activities." Not all pilot nurses found it helpful: one thought it too politically radical and one had a hard time getting into it. So you decide!

### Chapters:

• The Nature of Leadership: Distinguishing Leadership from Management • The New World and New Leadership: Changing our Thinking about Leadership • Followership and Empowerment • Leadership as an Integral Component of a Professional Role • Vision and Creativity • Gender Perspectives in Leadership • Disequilibrium and Chaos: Invigorating, Challenging, and Growth-Producing • Shaping a Preferred Future for Nursing • Developing as Leaders Throughout One's Career

## Gerontological Nursing

NEW

*Gerontological Nursing & Healthy Aging* provides a holistic perspective to caring for older adults. Designed to facilitate the healthiest adaptation possible, this text identifies potential problems that may occur and the means to address complications, alleviate discomfort, and help older adults lead healthy lives.

CCM

AACN-B

### Key Features:

- Focuses on health and wellness to establish a positive perspective to aging.
- Integrates age, cultural, and gender differences throughout.
- Healthy aging strategies maximize the healthiest behaviors of clients with dementias.
- Incorporates assessment guidelines throughout.

### Inside:

**Section 1: Foundations of Healthy Aging:** Gerontological Nursing History, Education, and Roles • Communicating with Elders • Culture and Aging • Documentation for Optimal Care

**Section 2: Changes of Aging:** Theories and Physical Changes of Aging • Social, Psychological, Spiritual, and Cognitive Aspects of Aging • Nutritional Needs • Fluids and Continence • Rest, Sleep, and Activity • Promoting Healthy Skin and Feet • Maintaining Mobility and Environmental Safety • Assessment Tools in Gerontological Nursing • Safe Medication Use for Older Adults

**Section 3: Coping with Chronic Disorders in Late life:** Living with Chronic Illness • Pain and Comfort • Diabetes Mellitus • Bone and Joint Problems • Diseases Affecting Vision and Hearing • Cardiac and Respiratory Disorders • Cognitive Impairment

### Section 4: Caring for Elders and Their

**Caregivers:** Economic and Legal Issues • Relationships, Roles, and Transitions • Mental Health and Wellness in Late Life • Loss, Grief, Dying, and Death in Late Life • Care Across the Continuum

## Multisystem Disorders

*Strategies for Managing Multisystem Disorders* covers more than 75 disorders and how each condition can interact and affect other diseases. Includes descriptions, risk factors, prognosis, pathophysiology, focused assessment, clinical findings, diagnostic test results, collaborative management, treatment, and care.

CCM

It also provides:

- *Watchful eye* charts that target complications and coexisting disorders and tell you how to modify patient care
- *Drug alerts* that point you to possible adverse effects
- *Up close* illustrations that show you the pathophysiologic process involved.
- *A-to-Z organization* for ease of use.

## Documentation

*Mosby's Surefire Documentation* offers clear, practical guidelines for how, what, and when to document for more than 100 of the most common and important situations nurses face. Divided into three parts—*Caring for Patients*, *Dealing with Challenging Patient Situations*, and *Handling Difficult Professional Problems*—this resource details exactly what information to consider and document, so that you can ensure quality patient care, continuity of care, and legal protection for yourself and the institution where you work. You'll find:

AACN-B

- HIPAA and Joint Commission standards
- Expanded coverage of electronic documentation and its implications
- Tips to help you streamline documentation
- Special features such as *Charting Checklists*, *Legal Briefs*, and *Case Law Closeups* that illustrate important documentation and legal considerations.

## Diagnostic and Laboratory Tests

NEW

*Mosby's Manual of Diagnostic and Laboratory Tests* provides clear, concise coverage of more than 700 of the most commonly performed diagnostic and laboratory tests, including 30 new to this edition. Chapters are organized by test type and begin with a list of the tests covered, followed by a test type overview with specimen collection techniques. Tests are presented in a consistent format with normal findings, indications, test explanation, procedure and patient care, and test results and clinical significance, as well as any applicable contraindications, potential complications, interfering factors, and related tests.

**This course consists of two sections: each section is worth 23.5 contact hours (a total of 47 contact hours when you've finished both).**

**Included in Section A quiz:** Guidelines for Proper Test Preparation and Performance, Blood Studies, Electrodiagnostic Tests, Endoscopic Studies

**Included in Section B quiz:** Fluid Analysis Studies, Manometric Studies, Microscopic Studies, Nuclear Scanning, Stool Tests, Ultrasound Studies, Urine Studies, X-Ray Studies, Miscellaneous Studies

### *Quiz-only packets are available ...*

Anderson courses include books that you keep in your personal library after you earn your certificate. But you can also order a "quiz-only" packet for any of our courses if you already have the book and **have not yet used it for credit**. Quiz-only packets:

1-3 contact hours are \$13  
8 to 20 contact hours are \$21  
21 contact hours or more are \$29

There's no California sales tax on these packets. Quiz-packet shipping weight 1 lb.

Those who order quiz-only packets are entitled to free course(s) on page 7, but please add 1 lb if we're shipping them.

(See also Benefit 3 about e-mailing.)

## Rehabilitation Secrets

*Rehabilitation Nursing Secrets* will serve both the novice nurse and the expert nurse by providing a 'what,' 'why,' and 'how,' approach through a quick question and answer format addressing assessment, monitoring, therapeutic interventions, pathophysiology of common disorders requiring rehabilitation, and client/family education. Additionally, it is grounded in evidence-based practice and includes clinical 'pearls' for significant conditions. The author hopes this book will assist nurses in improving quality of life, providing cost-effective quality care, achieving client satisfaction, and helping clients to reach optimal function in the shortest period.

## Physical Exam Handbook

*Mosby's Expert Physical Exam Handbook: Rapid Inpatient and Outpatient Assessments* allows you to rapidly find what you need, easily accessed in either hospital or clinical setting. Content is organized by body region—for example, chest and back—rather than by body system, an approach that provides an excellent method for conducting a thorough examination. What's more the book will help you realize when to shift gears and focus the examination on a critical sign or chief complaint.

### Special features:

- *Disorder Close-Ups* focus on the most common disorders encountered by nurses, including characteristic findings as well as complications.
- *Action STATs* tell you what to do if your patient is in a potentially life-threatening situation.
- *Interpreting Abnormal Findings* helps you analyze abnormal findings and determine causes.
- *Lifespan Considerations* help you individualize exams for patients of various ages and those who are pregnant or lactating (but not peds patients).
- *Cultural Considerations* provide information on transcultural considerations.
- *Spanish-English Assessment Terms* provide you with key assessment questions and findings.

## Wound Care

In addition to the typical content on wound infection, support surfaces for wound beds, and common chronic wounds, *Wound Care Essentials: Practice Principles* includes new content on surgical wound care, palliative care, and wound care in pediatric patients and bariatric patients, as well as expanded coverage of skin conditions and the role of nutrition in wound care.

CCM

### Chapters include:

**Part 1—Wound Care Concepts:** Quality of Life and Ethical Issues • Regulation and Wound Care • Legal Aspects of Wound Care • Skin: An Essential Organ • Acute and Chronic Wound Healing • Wound Assessment • Wound Bioburden • Wound Debridement • Wound Treatment Options • Nutrition and Wound Care • Pressure Redistribution: Seating, Positioning, and Support Services (all of the above are in the **Section A quiz**) • Pain Management and Wounds.

**Part 2—Wound Classifications and Management Strategies:** Pressure Ulcers • Venous Ulcers, Lymphedema, and Compression Therapy • Arterial Ulcers • Diabetic Foot Ulcers • Sickle Cell Ulcers • Surgical Wounds, Tubes, and Drains • Atypical Wounds • Wounds in Special Populations • Palliative Wound Care.

## Mosby's Oncology Nursing Advisor

NEW

*Mosby's Oncology Nursing Advisor: A Comprehensive Guide to Clinical Practice* provides quick access to essential information on a wide range of cancer topics, including types of cancer, treatment options, symptom management, palliative care, and patient teaching. Its user-friendly layout make it ideal for use in any clinical setting.

CCM

### Key Features:

- Detailed descriptions of over 50 major cancer types provide essential information on incidence, etiology and risk factors, signs and symptoms, diagnostic workup, histology, staging, treatment, prognosis, and prevention.
- Coverage of cancer management principles outlines a wide range of treatment and pharmacologic modalities, including surgery, chemotherapy, radiation therapy, hormonal therapy, biological response modifiers, and complementary and alternative therapies.
- Symptom management guidelines provide in-depth coverage of pathophysiology, assessment tools, lab and diagnostic tests, differential diagnoses, interventions, follow up care, and resources for over 30 common symptoms associated with cancer and cancer treatments.
- Essential information on many oncologic emergencies and emergent issues prepares you to respond quickly to structural, metabolic, and hematologic emergencies.
- An entire section on palliative care and end-of-life issues offers helpful guidelines for dealing with topics related to hospice care, communication in palliative care, the final hours of the cancer patient, ethical considerations, and loss, grief, and bereavement.
- Serves as a great study tool for the oncology nursing certification exam.

## CMSA Core Curriculum for Case Management

This edition contains the core body of knowledge for case management practice as delineated by the Case Management Society of America (CMSA)—the largest professional organization of case managers—as well as reflecting the changes taking place in today's models and programs. Chapters are written in an outline format.

CCM

Contains essential information about:

- U.S. and international case management practices
- The roles and functions of case managers as they relate to various care settings, specialty practices, and patient populations
- Tools and protocols for better case management
- Legal, ethical, and safe case management practice
- Case management model design
- Evaluating performance and productivity
- Evaluating the effectiveness (or ROI) of case management programs and models

## Communication

NEW

The goal of *Communication for Nurses: Talking with Patients* is to retrofit your communication skills with techniques that will withstand the stressful healthcare environment to help you become a better communicator.

- The book first takes a look at the ethical, legal, and professional guidelines for communication as a facet of nursing care. Interviewing skills are reviewed as both a science and an art. Next, the book examines communication with specific patient populations and situations. How do you deal with a patient in a crisis situation? How do you communicate with an intubated patient? These are some of the topics that provide practical approaches to difficult communication situations. They are intended to serve as guidelines for when you are at a loss for words. Finally, the book has new sections on compassion and the emotional work of nursing, and working with colleagues.

\*Enter the code(s) on the order form. Offer good only if shipped in the same package as your order. Not transferable to anyone else. Additional courses on this page beyond your two free contact hours are \$11 each (shipping is included).

Please note that although these courses are listed by state, any nurse may complete them (the only exception is the Ohio course) and earn ce credit.

## Florida

### Prevention of Medical Errors

2 contact hours **NEW**

Florida requires two contact hours in prevention of medical errors every renewal cycle. This course addresses error-prone situations, types of medical errors, and ways to solve the problem.

**AACN-B**

Published by Anderson in 2011  
Course valid thru 12/31/15  
Order code: 2ERRNSG11

### Domestic Violence

2 contact hours **NEW**

Learn: How domestic violence presents in the health care setting • How to identify abuse • What about the victims? • Perpetrators • Intervention.

**AACN-B**

*Please note:* Domestic violence is now a two contact hour requirement every third renewal. Published by Anderson in 2011  
Course valid thru 12/31/15  
Order code: 2DOMESTIC11

### Advances on the AIDS Horizon

1 contact hour

This course is an overview of HIV/AIDS and the groups it is affecting today.

*Please note:* HIV/AIDS is a one-time, one contact hour requirement to be completed prior to the first renewal.

Published by Anderson in 2009  
Course valid thru 12/31/13  
Order code: 1AIDS09

## Kentucky

### Advances on the AIDS Horizon

2 contact hours

Kentucky nurses must complete two contact hours on HIV/AIDS once every ten years. This course covers transmission, infection control, clinical management, and prevention.

Published by Anderson in 2009  
Course valid thru 12/31/13  
Order code: 2AIDS09

## Michigan

### Chronic Pain

1 contact hour

**NEW**

This course examines the assessment, treatment, and psychological issues of chronic pain. It also addresses two special populations with significant needs relating to pain. Meets MI requirement.

Published by Anderson in 2011  
Course valid thru 12/31/2015  
Order code: 1PAIN11

**AACN-B**

## Ohio

### Ohio Law

1 contact hour of Category A  
(laws and rules) will be provided.

**NEW**

This course is designed to satisfy the requirement that nurses licensed in Ohio earn one contact hour in the laws and rules pertaining to the practice of nursing.

**AACN-B**

This continuing nursing education activity was approved by the Ohio Nurses Association (OBN-001-91), an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

Approval valid through May 13, 2013. Assigned ONA #15,009-I.

Order code: 1OHIO11

*(Please note that this course is approved only for RNs and LPNs, not dialysis technicians.)*

If you order 12 to 23 contact hours, these courses are \$11 each (no shipping). Ordered separately, all courses on this page are \$17. Add 1 lb shipping. Quiz-only packets are \$13. If you order 24 contact hours of quiz-only packets you are entitled to two contact hours free, but please add 1 lb shipping if we're going to ship them.

*Note:* If you place your order online, you can now complete these courses online whether you're paying for them or they're free. Just go to **andersonCE.com**, then to Customer Account. Put in the same account number and password that you used to order the course. The reading material and quiz will be there waiting for you.

## Priorities in Critical Care Nursing

This text was written for practitioners of critical care, clinical nurse specialists, and critical care educators, but not the novice to critical care. It implies an understanding of anatomy and physiology and basic pathophysiology and the management of more common aspects of acutely ill patients. This text addresses the controversies in critical care management—the emerging truths that threaten old myths—and bridges the gap between medical research and animal model research in critical care and today's bedside practice. It advances the professional knowledge of the critical care nurse to a high degree.

AACN-A

### Contents:

**Unit One: Foundations of Critical Care Nursing Practice.** Caring for the Critically Ill Patient, Ethical and Legal Issues, Patient and Family Education

**Unit Two: Common Problems in Critical Care.** Psychosocial Alterations; Sleep Alterations; Nutritional Alterations; Gerontologic Alterations; Pain and Pain Management; Sedation, Agitation, and Delirium Management; End-of-Life Care

**Unit Three: Cardiovascular Alterations;**  
**Unit Four: Pulmonary Alterations.** Assessment and Diagnostic Procedures, Disorders, Management

**Unit Five: Neurologic Alterations; Unit Six: Renal Alterations; Unit Seven: Gastrointestinal Alterations; Unit Eight: Endocrine Alterations.** Assessment and Diagnostic Procedures, Disorders and Therapeutic Management

**Unit Nine: Multisystem Alterations.** Trauma, Shock and Multiple Organ Dysfunction Syndrome, Hematologic and Oncologic Issues.

## Emergency Nursing

*Mosby's Emergency Nursing Reference* does an excellent job of addressing each body system and common chief complaints and procedures from the perspective of the ED nurse: initial presentation, differential diagnoses, diagnostic tests and procedures, expected outcomes, and discharge instructions. Special features:

AACN-A

- *Nursing Alerts* highlight crucial considerations for ED personnel.
- *Nursing Care Priorities* highlight the most common diagnoses for a clinical condition, as well as possible causes, signs and symptoms, and interventions.
- 22 common clinical conditions are covered.
- 37 procedures are outlined in a clear, step-by-step format – including nine new procedures.
- Age-specific considerations provide pediatric and geriatric information.
- New: Safety in the ED; triage; and chemical, radiation, and biologic exposure.

By Julia Fultz, RN, BSN, CEN, CFRN

### Benefit 3

*If you already have the book, quizzes can be e-mailed ...*

If you have high speed internet access, we can e-mail any quiz (except for the ECGs quiz).

If you'd like us to send the quiz to your e-mail address, please order it over the phone. There's no California sales tax and no shipping.

We'll e-mail it quickly, and you can fax (or e-mail) the answer sheet to us. We're happy to fax (or e-mail) a certificate back to you the following day, at no charge, if you request it. (See Benefit 1.)

We have a growing list of courses that you can order and complete online. Check [andersonCE.com](http://andersonCE.com) for what's available.

## Cardiac Surgery Essentials for Critical Care Nursing

NEW

*Cardiac Surgery Essentials* is an evidence-based foundation for care of the patient during the vulnerable period immediately following cardiac surgery. A comprehensive resource, this text serves as a building block for nurses beginning to care for cardiac surgery patients, as well as a source of advanced knowledge for nurses who have mastered the essential basic skills. It addresses significant changes in cardiac surgery and the nursing responsibilities to meet the needs of these acutely ill patients, as well as advances and strategies to optimize patient outcomes.

AACN-A

### Chapters:

Clinical Judgment in Critical Care • Cardiovascular Anatomy and Physiology • Indications for Cardiac Surgery • Preoperative Cardiac Surgery Nursing Evaluation • Heart Valve Surgery • Minimally Invasive Cardiac Surgery • Cardiopulmonary Bypass and Off-Pump Coronary Artery Bypass • Recovery from Anesthesia • Hemodynamic Monitoring • Intra-aortic Balloon Pump • Mechanical Ventilation after Cardiac Surgery • Pharmacologic Support Following Cardiac Surgery • Postop Complications of Cardiac Surgery and Nursing Interventions • Pain Management • Postoperative Dysrhythmias • Neurologic Complications • Fluid and Electrolyte Imbalances Following Cardiac Surgery • Wound Care • Bridge to Transplant and Cardiac Transplantation.

## ECGs & the Heart

User friendly and not intimidating, *ECGs & the Heart*, a **Saunders Nursing Survival Guide**, will help you brush up your skills on waveform analysis, atrial and ventricular rates, premature ventricular contractions, ventricular tachycardia, asystole, ventricular fibrillation, heart blocks, dysrhythmias, pericarditis, myocardial infarction, and special considerations such as drugs that should be used in the treatment of various dysrhythmias, pacemakers, drug abuse, surgical therapy, and cardiac trauma. Features include:

AACN-A

(continued at top of next column)

(continued)

- 2-color ECG strips that demonstrate the effect of various conditions on the ECG waveform
- Special icons to alert you to vital facts about life span issues, cultural implications, cautions/dangers, and web links
- Age-specific information.

## Core Curriculum for Critical Care Nursing

Organized by body system and written in an outline format, this resource on administering quality nursing care to critically ill patients covers basic to advanced nursing care with an emphasis on clinical practice.

AACN-A

### New to this Edition:

- A new chapter on professional care, ethical practice, and the AACN Synergy Model.
- A new chapter on Critical Care Patients with Special Needs, including bariatric, geriatric, high-risk obstetric, pediatric (in an adult ICU or stepdown unit), and sedated patients, and those requiring transport.
- New content on chest tubes, liver transplanation for acute liver failure, spirituality, and spiritual aspects of care.
- AHRQ evidence-based practice guidelines.

**Chapters:** Professional Caring and Ethical Practice, Pulmonary System, Cardiovascular System, Neurologic System, Renal System, Endocrine System, Hematologic and Immunologic Systems, Gastrointestinal System, Multisystem, Psychosocial Aspects of Critical Care, and Critical Care Patients with Special Needs.

*Please note: This course is designed for certified critical care nurses or those preparing for critical care nursing certification.*

- Edited by Alspach, RN, MSN, EdD, FAAN
- 6th edition / Published by Elsevier Saunders
- and AACN in 2006 / Course valid thru 12/31/12
- Soft cover / 967 pages / 6 lb

- **30 contact hours (book and section A quiz)** \$89
- Order code: CORE0630A
- **30 contact hour quiz-only packet for section B** \$29
- Order code: CORE0630B quiz-only
- **Order all 60 contact hours (with book) for \$118 \$99**
- Order code: CORE0630AB
- Both quiz-only packets: \$39 (\$29 + \$10)

**Book only (publisher's price)** \$82

## Handbook of Dialysis Therapy

This handbook gives you access to in-depth, expert problem-solving assistance for the care of both adult and pediatric dialysis patients.

This course is designed for experienced renal nurses and practitioners. It is written at the clinical application and analysis level for registered nurses who perform detailed physical assessments, interpret lab results, and intervene to provide quality, safe patient care. Many of the sections of this resource manual have been written by practicing physicians who share a wealth of knowledge about renal physiology along with prescriptive standards to improve patient outcomes.

### Table of Contents:

Vascular Access for Hemodialysis; Peritoneal Access Devices; Mechanical Aspects of Dialysis; Dialyzers; Improving Outcomes in Dialysis Patients; Complications During Hemodialysis; Reuse of Hemodialyzers; Alternative Hemodialytic Techniques; Peritoneal Dialysis: Clinical Practice, Infectious Complications, Noninfectious Complications, and Intra-abdominal Pressure-Related Complications; Acid-Base Homeostasis; Nutritional Management of Dialysis Patients; Gastrointestinal Disease; The HIV-Infected Patient; Anemia and Epoetin Use; Cardiovascular Disease; Metabolic Abnormalities; Neurologic Aspects of Uremia; Uremic Osteodystrophy; Dialysis Amyloidosis; Acquired Cystic Kidney Disease; Diabetes; Drug Use in Uremia; Rehabilitation and Psychosocial Issues; Pediatric Dialysis; Surgery; The Pregnant Patient; and Drug Overdose.

**Dialysis Therapy consists of two sections: each section is worth 35 contact hours (a total of 70 contact hours when you've finished both sections).**

By Nissenson, MD, et al. / 4th edition / Published by Saunders Elsevier in 2008 / Course valid thru 12/31/13 / Soft cover / 1,520 pages (the book's size is 7 1/4" x 4 1/2") / 4 lb

**35 contact hours (book and section A quiz) \$91**  
Order code: DIAL0835A

**35 contact hour quiz-only packet for Section B \$29**

Order code: DIAL0835B quiz-only

**Order all 70 contact hours (with book) for \$120 \$101**

Order code: DIAL0835AB

Both quiz-only packets: \$39 (\$29 + \$10)

**Book only (publisher's price) \$83**

## Handbook of Dialysis

We decided to offer this course after a conversation with a nurse who teaches dialysis classes all over the US. She recommended this book, saying that it's found in every dialysis unit in the country, and is one of the books nurses refer to when they have questions. It is a high level book, written by physicians. The course will offer a wealth of information for nurses (experienced or inexperienced) working in the dialysis setting. It will help them understand the rationale behind physician orders.

The handbook provides information on all aspects of dialysis, with emphasis on day-to-day management of patients. Chapters provide complete coverage of hemodialysis, peritoneal dialysis, special problems in dialysis patients, and problems pertaining to various organ systems. New:

- National Kidney Foundation's KDOQI guidelines (2006) concerning hemodialysis and peritoneal dialysis adequacy, vascular access, and nutrition, plus KDOQI chronic kidney disease and bone disease guidelines.
- How to set up frequent daily or nocturnal hemodialysis, and hemodiafiltration.
- Completely revised and expanded chapters on vascular access, with emphasis on AV fistula creation.

By Daugirdas, MD / 4th edition / Pub. by Lippincott Williams & Wilkins in 2007 / Course valid thru 12/31/12 / Soft cover / 773 pages (8" x 4") / 2 lb

## Perianesthesia Nursing

*Perianesthesia Nursing: A Critical Care Approach* integrates the nursing interventions, pharmacology, pathophysiology, and special considerations necessary for optimal patient care. A strong focus on research, documentation, and psychosocial influences makes this an excellent tool for new and experienced perianesthesia nurses. It's also a terrific way to prepare for CAPA/CPAN.

### New chapters:

- Infection control in the PACU
- Research: Evidence-based Clinical Practice
- Postanesthesia Care Complications
- Care of the Intensive Care Unit Patient in the PACU

AACN-A

### Contents:

#### Section I. The Postanesthesia Care Unit

Includes Crisis Resource Management, Infection Control, Managed Care, Legal Issues, Ethics.

#### Section II. Physiological Considerations in the PACU

Covers all the systems.

#### Section III. Concepts in Anesthetic Agents

Inhalation Anesthesia, Nonopioid Intravenous Anesthetics, Opioid Intravenous Anesthetics, Neuromuscular Blocking Agents, Local Anesthetics, Regional Anesthesia.

#### Section IV. Nursing Care in the PACU

Transition from the OR, Assessment and Monitoring, Complications, Assessment and Management of the Airway, Pain Management, Care of patients following all the various types of surgeries (one chapter each).

#### Section V. Special Considerations

Care of the Patient with Chronic Disorders; Care of Pediatric, Geriatric, and Pregnant Patients; Care of the Substance Using Patient; Care of the Patient with Thermal Imbalance; Care of the Shock Trauma Patient; Bioterrorism; Cardiopulmonary Resuscitation in the PACU.

By Cecil B. Drain, PhD / 5th edition / Published by Saunders in 2009 / Course valid thru 12/31/14  
Hard cover / 871 pages / 5 lb

**Peri09 is worth 55 contact hours when you've finished both sections. Section A is worth 25 contact hours; Section B is worth 30 contact hours.**

**25 contact hour (book and section A quiz) \$93**

Order code: PERI0925A

**30 contact hr quiz-only for Section B \$29**

**Book only (publisher's price) \$84**

## Berry & Kohn's Operating Room Technique

*Berry & Kohn's* focuses on the physiologic, psychologic, and spiritual considerations of perioperative patients to provide guidelines and standards for planning and implementing safe, comprehensive, individualized care. A systems approach is introduced to help organize patient care to minimize human error.

### Features of this edition:

- Specific surgical procedures are described in each specialty chapter.
- Provides in-depth coverage of patients with special needs related to age or health status.
- Addresses perioperative patient care in inpatient, ambulatory, and alternative sites.

### New to this edition:

- A new chapter on Spinal Surgery.
- An expanded Legal and Ethical Issues chapter.
- The Ambulatory Surgery Centers chapter has been expanded to cover additional alternative site surgeries, including mobile hospitals for the military.
- Bioterrorism is discussed in the Decontamination and Disinfection chapter.

***Berry & Kohn's* consists of two sections: each section is worth 30 contact hours (a total of 60 contact hours when you've finished both).**

By Nancymarie Phillips, RN, BSN, BA, MEd, RNFA, CNOR / 11th edition / Published by Mosby in 2007  
Course valid thru 12/31/12 / Hard cover  
1,024 pgs / 6 lb

**30 contact hours (book and section A quiz) \$111**

Order code: OPERATE0730A

### **Alexander's Care of the Patient in Surgery**

• The 14th edition of *Alexander's* is in print. We're hoping to have the four new quizzes ready by late August. Until then, we'll continue to offer quizzes for the 13th edition. Four quizzes accompany the 13th edition, each worth 22 contact hours. (We'll list the new course on the web site as soon as it's finished.)

• By Rothrock, DNSc, RN, CNOR, FAAN, et al.

• 13th edition / Published by Mosby Elsevier

• in 2007 / Course valid thru 12/31/12

• **Quiz-only packets:** \$29 for first one; \$39 for two;

• \$49 for three; \$59 for all four.

• Order code: SURG0722 and then A, B, C, or D.

• Shipping weight: 1 pound for up to 4 quizzes.

## AWHONN Perinatal Nursing

Inside this resource for nurses who care for women and newborns, you'll find:

- Fundamentals of normal development, from physiologic changes and psychosocial adaptation to care of the postpartum woman and newborn assessment and care.
- Guides to nursing care during labor and birth based on the latest evidence, standards, and guidelines, including fetal assessment, cervical ripening and labor induction, cesarean birth, and perioperative safety.
- Management of complications, such as hypertensive disorders, preterm labor, bleeding in pregnancy, cardiac disease, diabetes, pulmonary disease, and multiple gestation.

**Chapters in Section A:** Perinatal Patient Safety and Professional Liability; Integrating Cultural Beliefs and Practices; Physiologic Changes of Pregnancy; Psychosocial Adaptation to Pregnancy and Postpartum; Antenatal Care; and High-risk Pregnancy.

**Chapters in Section B:** Labor and Birth; Fetal Assessment During Labor; Pain Relief and Comfort Measures in Labor; Postpartum Care; Newborn Adaptation to Extrauterine Life; Newborn Physical Assessment; Newborn Nutrition; and Common Neonatal Complications.

## Manual of Neonatal Care

*Manual of Neonatal Care* is written for neonatal residents, nurse practitioners, and nurses working in neonatal intensive care. In an outline format, it provides information on maternal, fetal, and neonatal problems, as well as common neonatal procedures.

**AACN-A**

One pilot study nurse writes:  
"This book is written by physicians and ... the main audience targeted seems to be physicians. However, the book does apply to neonatal nurses and I would recommend it for them. It is important for nurses to know the specialized pathophysiology, disease process, diagnostic pathways, medical

(continued from previous column)

rationale for treatment, and current recommended treatments for the neonate in order to apply appropriate nursing treatment/care." Another pilot study nurse writes: "Excellent resource and coverage of all aspects to do with neonatal intensive care. Easier for the experienced nurse."

**CCM**

### Just some of the chapters:

Resuscitation in the Delivery Room, Care of the Extremely Low-Birth-Weight Infant, Multiple Births, Genetic Issues Presenting in the Nursery, Fluid and Electrolyte Management, Breast-feeding, Temperature Control, Shock, Drug Abuse and Withdrawal, Birth Trauma, Ethical Dilemmas, Infections, Respiratory Disorders, Cardiac Disorders, Hematologic Problems, Neurology, Orthopedic Problems, Metabolic Problems, Renal Conditions, Surgical Emergencies in the Newborn, and Common Neonatal Procedures.

*Please note: The book has very small print.*

## The 36-Hour Day

*The 36-Hour Day: A Family Guide to Caring for People with Alzheimer Disease, Other Dementias, and Memory Loss in Later Life* is, according to the *Library Journal*, “an excellent, practical manual for families and professionals involved in the care of persons with progressive illnesses.”

AACN-B

Over the past 25 years, this book has become the “bible” for families caring for people with Alzheimer disease. In addition to the practical and compassionate guidance that has made *The 36-Hour Day* so valuable to caregivers, this edition includes information on diagnostic evaluation, research, medications, the biological causes and the effects of dementia, legal and financial information, and nursing homes and other communal living arrangements.

By Mace, MA / Published by Johns Hopkins University Press in 2006 / Course valid thru 12/31/11 / Soft cover / 324 pages / 2 lb  
**12 contact hours** (book and quiz) \$34  
 Order code: 36HOUR06  
**Book only (publisher's price) \$17**

## Difficult People

AACN-C

*Caring for People with Challenging Behaviors: Essential Skills and Successful Strategies in Long-Term Care* helps professional caregivers develop effective ways to prevent, reduce, or eliminate residents' challenging behaviors and alleviate their own stress. Recommended solutions include identifying the “ABCs of Behavior”—the antecedents, behaviors, and consequences—and using practical communication techniques and evidence-based psychological approaches to encourage positive behavior.

By Stephen Long, PhD / Health Professions Press in 2005 / Course valid thru 12/31/11  
 Soft cover / 164 pgs / 1 lb  
 Order code: BEHAVIOR05  
**10 contact hours** (book and quiz) \$45  
**Book only (publisher's price) \$33**

## Prescription Drug Addiction

*Overcoming Prescription Drug Addiction: A Guide to Coping and Understanding* is a light-reading introduction to this important topic. It addresses the nature of addiction as a chronic, progressive disease; how drugs of addiction hijack the brain; the most commonly abused prescription drugs; treatment options, including medical detox and family interventions; insights on recovery by addiction medicine physicians; compelling stories of recovery as told by former addicts.

By Colvin / 3rd ed / Pub. by Addicus Books in 2008

**10 contact hours** (book and quiz) \$31  
 Order code: PRES08

## Diabetes

NEW

*The Guide to Patient Management & Prevention of Diabetes* is a handbook that offers comprehensive and current information regarding the diagnosis, treatment, and management of Type 1 and Type 2 diabetes, as well as other related blood glucose conditions. Written by an expert physician and a nurse/diabetes educator from Scripps Whittier Diabetes Institute, this text provides extensive information on all clinical aspects of diabetes, including classifications of glucose disorders, medical nutrition therapies, glucose monitoring, and the psychosocial care of diabetes patients. A CD-ROM of patient education and clinical resources is included.

By Philis-Tsimikas, MD, et al. / Published by Jones and Bartlett in 2011 / Course valid thru 12/31/16  
 Soft cover / 227 pgs (book is 5" X 8") / 2 lb  
**9 contact hours** (book and quiz) \$49  
 Order code: DIAB11  
**Book only (publisher's price) \$40**

## The Back Book

This is a light-reading overview of the problems of back pain. It will be most useful in patient education.

Includes: an overview of the anatomy of the back • an explanation of the most common causes of back pain and how to avoid or minimize them • a tour of the diagnostic process, including x-rays and MRIs, and other tests • a guide to nonsurgical pain management • surgical options • tips on how to keep your back strong and healthy throughout your life.

By Gokaslan, MD, et al / A Johns Hopkins Press Health Book / Published in 2008 / Course valid thru 12/31/13 / Soft cover / 144 pages plus index / 2 lb  
**9 contact hours** (book and quiz) \$31
